PROFESSIONAL SERVICES

NEWCOM offers a full range of products and services competitively priced and backed by a team of highly experienced and skilled professionals. Partnering with leading manufacturers, NEWCOM designs the most comprehensive systems based on our clients needs, maximizing "off the shelf" solutions with customized applications. We have developed solutions across numerous markets and applications. Our areas of specialty include:

- AVL / GPS
- Traffic Management Systems
- Wireless Communication
- Sensor Technology
- Data Center and Infrastructure

PROJECT MANAGEMENT

With a dedicated customer interface, our project managers along with our system engineers and configuration specialists determine system design, project requirements, and any third party integration or customization. Pulling together the configuration, location, and infrastructure requirements, our teams ensure schedules and milestones are met.

OUR APPROACH

NEWCOM centers on you and your organization. What does your organization need to accomplish? And equally important, what do you want to accomplish?

The right questions are asked to learn about your situation, and offer the expertise you need to help craft the best solution.

Whether we're creating a total solution or recommending a service or product to supplement what you are doing, NEWCOM understands what it takes to change people and organizations and knows how to leverage technology and solutions to achieve the best result. NEWCOM believes the best solution builds on what you are already doing and what you know. Together, we can be confident that the solution will achieve what you need to execute your strategy, now and in the future.
