

# Neverfail's IT Service Empowerment Suite

Ensuring Resilient IT Service Delivery at Scale

Neverfail enables public safety to meet or exceed service levels by providing continuous connectivity to applications, data, and infrastructure. Neverfail provides bulletproof technology, industry-leading experience, and a complete dedication to customer success. Our suite of IT Service Continuity solutions allows IT departments to focus on innovation, not operations – unlocking new routes to revenue, uninhibited scale, and impeccable resiliency of user, systems, and application availability.

## Assuring Resiliency at Scale

IT departments are being challenged to meet evolving requirements that need higher availability with less resources and budget than ever before. As organizations scale, any loss of service availability could severely impact budgets and reputation. Neverfail's suite of solutions mitigates the risk of downtime and enables IT departments to deliver on the service levels required to succeed without requiring additional resources, budget or staff.

Additionally, as a one-stop shop for IT Service Delivery, Neverfail provides the Cloud, Connectivity, and Continuity solutions that bolster the value and validity of your IT services portfolio. Underpinned by a goal of complete data efficiency and protection, Neverfail has made it simple to build a service that never fails.

## Key Benefits

- Comprehensive data protection to deliver blazing fast RPO and RTOs
- Remote connectivity to access your data and applications from anywhere, at anytime
- Uninterrupted business operations and innovation
- Application-aware business continuity that allows for proactive prevention against downtime
- Built-in security and DDoS prevention to mitigate against security threats
- Workload and data center migration with zero downtime
- Tier-IV Gold certification in the world's most secure data centers
- On-demand infrastructure for uninhibited scale

## Providing Superior Experience at a Lower Cost

Neverfail clouds are made exactly to today's IT provider needs: a network that reduces complexity, cuts costs, and provides users with a secure experience that allows for on-demand growth and scalability.

**Product:**

- Secure Cloud
- Bare Metal Cloud
- Private Cloud
- Hybrid Cloud

## Increase Productivity Through Connectivity

Neverfail offers a layer of security for your sensitive data and applications. Secure connectivity keeps data off your devices and within a secure cloud environment, shielding your data from unauthorized intrusion while enabling remote access, streamlined on/offboarding, and compliant BYOD capabilities for your entire organization.

**Product:**

- Workspaces

## Deliver Complete and Consistent Availability

Neverfail products deliver continuous availability that organization, their users, and their customers demand to ensure uninterrupted operations; allowing IT to meet or exceed service levels by proactively avoiding downtime altogether.

**Product:**

- Continuity Engine
- Health Check
- Continuity Cloud
- Migrate

## Affordable Bulletproof Data Protection

Neverfail believes data efficiency is the underpinning foundation of effective IT services delivery. Reducing storage requirements, deduplicating data, and increasing WAN efficiency allows for comprehensive, end-to-end data protection without the enterprise price tag.

**Product:**

- HybriStor

## Summary

More than a name, Neverfail is an ideology that is core to their DNA. It is a passion that drives everything they do. By creating a one-stop for IT, they have enabled the ability to scale without boundaries and run a more efficient business without the need for additional resources. To never fail means to continually strive for innovation, to push farther than the competition, and to give everything they have so that their partners, and their customers, have continual access to applications, data, and infrastructure. It is because of this ideology that thousands of organizations trust Neverfail with their livelihood, reputation, and revenue.

## Preventing Downtime

*“Before Neverfail, making the decision to failover to the secondary site was a tricky one, as we had to be prepared for the systems to be up to six hours out of step. Now, the decision is simple; applications can be seamlessly transferred to the DR site in the event of an outage or even for ad-hoc maintenance work without disruption to everyday workflows.”*

—Lisa Corden  
Head of Technology,  
J O Hambro

## Accelerating Growth

*“The on-demand Infrastructure-as-a-Service Neverfail provided allowed us to go-to-market with expansion and new solutions to our customers faster than if we had to go through the procurement process. Utilizing Neverfail, we could spin up new solutions in days or hours rather than weeks or months.”*

—John Locascio
