

# SaltDNA Key Features

SaltDNA is a secure mobile communications system that allows users to voice call, text message, conference call or send files with the highest confidence.

## MOBILE APP FEATURES

### SECURE MESSAGING

Our solution offers users the ability to send secure one-to-one messages to their SaltDNA contacts.

### SECURE VOICE CALLS

We allow users to make secure one-to-one calls with their contacts anywhere in the world on any network.

### GROUP CHATS

SaltDNA supports 15 person secure group chats. This allows users to share messages and attachments securely to a larger group of people.

### CONFERENCE CALLING

We pride ourselves on quality voice conferencing allowing up to 15 participants at any one time. All VoIP calls are encrypted and secure in any region.

### FILE TRANSFER

From confidential documents, to sensitive image transfer, SaltDNA allows for multiple file attachments that are completely encrypted end-to-end.

### MESSAGE BURN

Our burn functionality allows our users to purge information from their device & all recipients devices too. This can be done manually, or have a timer setting.

### APP PIN ENFORCEMENT

Organisations can enforce the need for users to set a pin within the SaltDNA app. Users can also voluntarily do this.

### SCREENSHOT PROTECTION

Administrators can restrict the capability of users to take screenshots. If screenshots are taken users will receive a message notification.

### IN APP RESTRICTIONS

Administrators have the ability to prevent users having the capabilities to download documents & images.

### MESSAGE FORWARDING

Users are able to forward secure messages with the SaltDNA app. Other users will be notified once a message has been forwarded from their conversation.

## DESKTOP

### FILE TRANSFER

Confidential documents of all formats can be sent to recipients via the SaltDesktop app. This allows users to share information securely from their desk to their contacts anywhere in the world.

### SECURE MESSAGING

Secure one-to-one and group chats can be carried out using the SaltDesktop application.

### SECURE CALLS

Users can carry out secure one-to-one and conference calls from the comfort of their desks.

### DOCUMENT STORAGE

Documents that have been sent and received can be stored on the SaltDesktop app. These files can be downloaded and burned at any time.

## MANAGEMENT CAPABILITIES

### ACCOUNTABILITY

Complete, centralized control over which communications are archived for accountability and regulatory compliance.

### DEPLOYMENT OPTIONS

Available as a hosted service or as an on-premise installation within private infrastructure.

### CENTRALIZED MANAGEMENT

Ability to provision and de-provision virtually instantaneously, from anywhere in the world.

### SECURE MANAGEMENT

Our platform uses Multi-Factor Authentication (MFA) to secure administrator credentials ensuring complete privacy and compliance.

### METADATA MANAGEMENT

Organisations have the control over how their metadata is managed. They can decide to have an archived version of all conversations, a statistical overview of comms, or for information to be immediately wiped.

### CLOSED CONTACTS

Organisations can effectively manage the communication channels within their company. They control who speaks to who as user's contact list is not linked to their personal device.

## UPCOMING FEATURES

### BROADCAST

We allow customers to push out live alerts to large groups of users within an organisation. This feature will enable organisations to send messages, share images & documents as well as assign the level of severity to an alert.

### VIDEO CALLS

We will be offering secure video calling in the near future. This will allow important users to speak securely, anywhere in the world with the personal touch of a video connection. Video conferencing is also being developed.

### PUSH TO TALK

Our push to talk capability will allow users to send live updates to colleagues in the field. If users have missed live alerts they can listen to previous messages and feed information back regarding a specific topic.
