

Sensor Technology Solution Assessment

1. Are you currently considering a smart building approach for your business that includes sensor technology? Yes No
2. Is this new building construction? Yes No
3. Are sensors currently installed in your environment? Yes No
4. How quickly do you want a Sensor Technology specialist to contact you? Now In the next 30 days Other

Are you interested in learning more about sensors and controls for the following in your business or organization?

Waste Management

- Trash collection placement and fill levels
- Pick-up route optimization
- Schedule of different waste types

Security and Safety Control

- Facial recognition passive temperature sensing
- Gated security with Thermal IR
- Humidity
- CO2 levels
- Harmful chemical sensing
- Electrical failures, fire sources and heat spikes
- Active and immediate reporting of incidents
- Missing fire and safety equipment
- Window and door monitoring
- Night or restricted access intrusion
- License plate readers

Space and Planning Management

- Occupancy sensing
- Space utilization
- Office resource allocation
- Traffic data
- Cleaning schedule optimization
- Asset Management

Parking Management

- Real-time data on lot availability
- Stress free parking experience
- Reduction of carbon footprint
- Improved visibility into parking space usage
- Emergency call boxes
- License plate validation

Do you have any immediate concerns or special situations that need sensor monitoring? Please explain:

Please specify your industry:
