Radio IP
ARMADA

Secure data for your smart devices!

Adopt a solution that complies with Public Safety standards!

Emergency services need their technological tools at all times. While ensuring your data flows are secured and optimized. Keep your first responders safe with a reliable and secure connection allowing them the best practice of their profession.

Are you sure your data transfers are secure?

The security of mobile devices is critical. For Public Security agencies with access to high content of sensitive data, securing their mobile devices is essential.

The protection of data exchanged through their smart devices and across wireless networks is therefore essential.
Adding a mobile VPN becomes critical.

Armada is the 4th generation of mobile VPN developed by Radio IP.

Dedicated to smartphones and tablets using Android and iOS operating systems

Armada ensures:

- Secure remote access to your agency's network resources.

- Securing data transmission over different unreliable wireless networks.

- Strong and rigorous authentication of connected devices.

- Easy and centralized administration of your device fleet.

- Simple integration, Cloud compatible or on premise deployment.

- Transparent roaming between WiFi and Cellular networks.

Armada is the only mobile VPN 100% made to meet Public Safety Standards.

FIRSTNET. Built with AT&T
VERIFIED

FIPS VALIDATED 140-2

CRIMINAL JUSTICE INFORMATION SYSTEM · CJIS ·

Radio IP

Advantages

- A unique user experience thanks to a single authentication.
- No user intervention required on Lost connection event
- Fast and reliable access to information.
- Increase the efficiency and productivity of your officers.
- Reduced costs: fewer calls to your IT department, fewer support tickets
- 100% software solution to easily establish of a secure virtual tunnel.
- Compatible with all types of applications.
- Supports all types of WiFi, LTE and Cellular networks.

Main fonctionnalities

- Session persistence to ensure constant application connectivity
- Complies with data encryption standards: IPS 140-2, AES 256, FBI CJIS, FirstNet.
- Robust device authentication: certificate exchanges.
- Group policy management.
- Tunnel segmentation (split-tunnelling).
- Public Safety standard grade.
- Seamless Roaming

Technical Characteristics

- Solution developed according to open standards: Mobile, IKEv2.
- Simplified integration into your architecture and deployment.
- Linux Gateway.
- Supports multiple hypervisors.
- Supports multiple authentication standards (LDAP, Radius, AD, etc…).
- Supports PKI systems.
- Compatible with Mobile Devices Management solutions (MDM).

Operating System:

Armada solution support's
VmWare or Hyper-V virtual machines.

Gateway	
Hypervisors	VmWare ESXi 5.0+ / Proxmox VE 5.x+
Operating System	RedHat 7+ / CentOS
Armada Client	
Minimal Android Version	Android 5.x+
Minimal iOS Version	iOS 11.4 +
Mult-IP Gateway Compatibility	
Armada Client Manager	Mult IP 5.0.1
