

Easy on the eyes in more ways than one.

Presenting the super ultra-wide curved S95UA.

You don't need two 16:9 monitors. You just need one S95UA. Featuring a super ultra-wide display, you can display two 16:9 screens side by side with no bezel or alignment issues, or you can enjoy one incredibly beautiful and expansive 32:9 desktop. The gracefully curved screen is easier on the eyes, too, since it minimizes eye strain and fatigue. Wide viewing angles ensure a sharp picture no matter what angle you or your colleagues are viewing it from. And Samsung's QLED technology combines with HDR400 and a color range that covers 95% of the DCI-P3 color space to make every image and video look incredible.

Key Features

Dual QHD and super ultra-wide screen

The 32:9 super ultra-wide display gives you the equivalent of two 27" 16:9 monitors. Display multiple windows on one screen or use it as a panoramic screen with no bezel down the middle, and without dealing with multi-monitor setups, installation and cables.

USB type-C, LAN port and built-in speakers

A single cable connection transmits a digital display signal, data (USB) and Ethernet (LAN) while simultaneously charging a device (up to 90W). Connect any PC, tablet or mobile device that has a USB-C port, and you'll have an instant workstation. And built-in speakers eliminate the hassle of installing separate speakers.

Curved screen and ultra-thin bezels

The 1800R curved screen minimizes eye strain and fatigue. The 3-sided bezel-less frame displays more picture and less plastic. And wide viewing angles ensure a sharp picture even from off angles.

QLED technology and DisplayHDR 400

With Samsung QLED technology, colors are crisp and pure, with a color range of 95% DCI-P3. HDR support brings a true high dynamic range of luminous blacks and whites to the screen.

Built-in KVM switch and Picture by Picture (PBP)

Users can control two sources with just one keyboard and mouse. Picture-by-Picture lets you display input from two PCs simultaneously for effortless collaboration.

AMD FreeSync, 120Hz, 4ms

AMD FreeSync technology works with a 120Hz refresh rate and 4ms response time to deliver crisp, blur-free and ghost-free images.

Adjustable stand and VESA compatible

The monitor swivels, tilts and is height-adjustable. VESA compatibility makes installation on a wall or mounting arm easy.

Samsung S95UA Series Desktop Monitors
