

A BETTER FLEET—YOUR FLEET

Know where they are, what they're doing, and how well they're doing it.

**FORWARD
THINKING**

REAL-TIME GPS TRACKING

Forward Thinking GPS will take your fleet to the next level by gathering all vehicle and driver activity, and helping you use it with a beautiful, easy-to-use interface. You'll cut costs, improve customer service, and stay ahead of the competition.

DRIVER SCORE-CARD

Protect your vehicles from harmful driving behavior like speeding, harsh braking and accelerating, and idling. Improving your drivers' habits will save money on fuel, maintenance, and traffic violation penalties. The driver score-card will help you improve bad driving and run a better, more profitable fleet.

DISPATCHING ROUTES

Simplify dispatching by sending routes directly to the driver's device. Every stop will be delivered and the driver will never get lost. Turn-by-turn commercial navigation will keep your drivers only on roads suitable for their vehicles (size, weight, hazardous materials, etc.).

ALERTS & NOTIFICATIONS

Stop bad things from happening by knowing about them in real-time. Speeding, Idling, activity out-of-hours, are just a few of the many alerts that can change the way you react to unwanted activity. You can also streamline tasks like scheduling vehicle maintenance by setting automatic reminders that make sure the right people know the work needs to be done.

INTELLIGENCE SAVES MONEY

When it comes to managing your fleet, you need as much information as possible, organized in a friendly, usable way. By adding up the savings from payroll, fuel, efficient routing, handling of billing disputes, and possible insurance savings, you will see an immediate return on your investment.

USEFUL REPORTS

All this activity data can be put to work improving your organization by using the many reports built to help managers and owners understand every aspect of their fleet's performance. Some examples of these reports are Vehicle Activity Log, Green Driving Report, Stop Report, Vehicle Diagnostics Report, and Engine On Time / Off Time.
