What It Does:

- Real-time GPS tracking for K9 officers
- Attaches to collar strap up to 1" Wide
- IP-67 Waterproof enclosures, snap closure
- 7 oz total weight
- 3 5/8" x 1 5/8" x 2 7/8" size
- CAT-M1 for all carriers (Includes FirstNet and Frontline)
- USB rechargeable battery, LiPo, 2.6 Ah capacity
- -20 to +60 C (-4 to 140 F) operating temp range
- Low battery alert in Track Star platform

The Track Star K9 Tracking Device is a simple and cost effective way to track the location and movement of K9 officers operating in any environment. The device is enclosed in a waterproof, shock-absorbing enclosure that is attached to the K9 by threading the collar strap through the slots provided in the enclosure.

The device is programmed to send GPS coordinate data to the Track Star software platform for viewing, reporting and activity replay functions. Track Star's TAIP Forwarder can be used, if desired, to "echo" GPS location data to most CAD / RMS platforms.
