

First Alert

Real-time breaking news alerts for the public sector

Receive the earliest indication of breaking news -- so you can respond quickly to public safety emergencies and events *as they happen*.

First Alert, Dataminr's product for the public sector, delivers real-time, breaking news alerts to help you make critical decisions with speed and confidence.

Leading AI Platform

Our AI platform processes information from more than 1,000,000 publicly available data sources and translates from 150+ languages. Improve overall awareness by receiving real-time, breaking news alerts from across the public information landscape, including: social media, blogs, information sensors, and the deep/dark web.

The First Alert Advantage

Receive the most relevant, actionable alerts that matter to you and your organization.

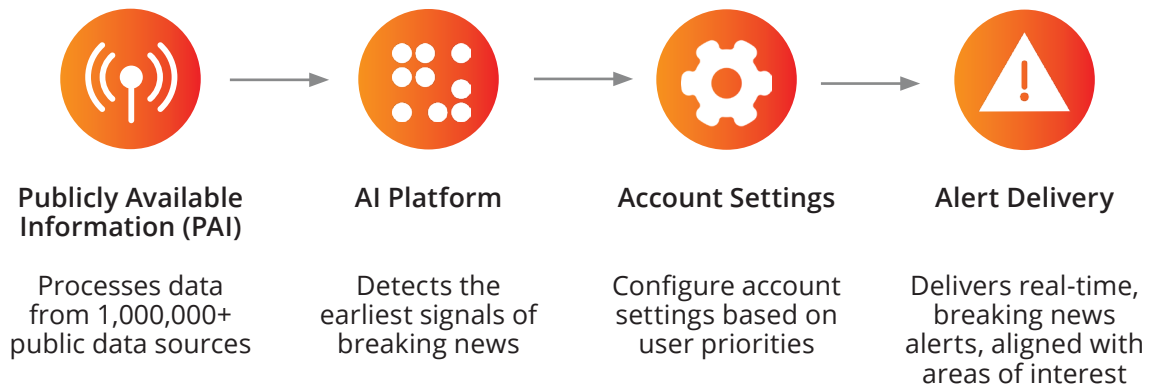

- Quickly understand each breaking news alert via single-sentence summaries
- Receive news alerts by email, mobile, or web-based notifications
- Streamline communications triage with one-to-many notifications
- Accelerate validation and response time with global, 24/7 coverage
- Easily deploy across the organization

How First Alert Works

Dataminr and NEWCOM

NEWCOM is an exclusive Authorized Partner in a collaborative approach to provide Tribal Nations with the tools they need for the fastest possible response. Dataminr's AI solution is the leader in generating real-time alerting for public and private sector organizations.

Real-time alerts on critical events and emerging risks allows for swift and informed decision-making. This advanced AI-driven platform enhances situational awareness by analyzing vast amounts of public information and detecting relevant signals. For Tribal Nations, this means improved disaster response, proactive community safety measures, and better protection of cultural and natural resources. By leveraging Dataminr, Tribal Nations can ensure timely and effective responses to threats, ultimately fostering a safer and more resilient community.
