

SteriFlight

Portable UVC Tower Light

The SteriFlight UVC + Ozone lamp is the most effective solution to sanitize a room from floor to ceiling and wall to wall, including equipment and supplies. It is being used by law enforcement and healthcare to clean vehicles and ambulances further reducing PPE waste. The portable easy to set up unit is effective to inactivate, and efficiently sterilize rooms up to 1K sq/ft. and kills bacteria, viruses, pollen, and molds.

SteriFlight Features

- Ultraviolet (UV)**
For UV sterilization, only UVC (100-280nm) has high enough energy to effectively kill microorganisms.
- Effective Sterilization**
UV sterilization is effective for viruses and bacteria, foodborne pathogens, natural microbiota, molds,
- Proven Technology**
The application of UVGI to disinfection has been an accepted practice since the mid-20th century.
- Quick Application**
Treated areas are immediately usable after servicing.
- Chemical Free**
No degradation to your environment equipment and without chemical residue.

More About NEWCOM

NEWCOM is a valued Partner of SteriFlight and can easily answer questions and help to explore options for your SteriFlight deployment. Our NEWCOM Engineers design and propose the right comprehensive product solution based on your department's integration requirements.
